giroflex
designed to work

Improving the world through engineering

Stoll Giroflex produces high quality ergonomic chairs. The company was established as long ago as 1872 and the spring-swivel chair with suspension was invented by the founder's son in 1926 and patented worldwide. From 1948, the products were sold under the brand name "Giroflex".

Join the IMechE on a tour of their facility in Koblenz and learn about their products. This visit has been organised by Walter Rovinolo.

Also open to non-IMechE members.

Thursday 5th March 2015,
16:00

Stoll Giroflex AG
Bahnhofstrasse 44
5322 Koblenz
