

Working Sessions

Attendees will be able to choose from several different Working Sessions throughout the event. Topics and format will be determined according to feedback received from EMEA sectors. Visit the website for updated details as the event gets closer.

The objective is to meet with experts from different domains of Systems Engineering and different countries. During the workshop, you will have the opportunity to exchange your ideas and experience to move forward on the selected topics.

The Systems Engineering topics will be carefully selected and covered in 5 parallel sessions. Each working session will be led by two experts. Some working sessions will also be organized as a panel where several perspectives will be presented and discussed. The roster of the sessions will be published on the website as planning progresses.

Registration Fee

► EUR 250,00 (INCOSE Members)

► EUR 550,00 (Non-Members)

Fee excludes travel & accommodations

Location & Travel

- Located in the heart of Europe
- 30 minutes to Frankfurt Rhein/Main International airport
- 10 minutes to Mannheim City Airport

For interested participants there will be a Technical Tour at John Deere (separate registration required). Please note: The number of visitors is limited.

About the workshop

The INCOSE EMEA Workshop 2017 is the event for Systems Engineers from the EMEA region to contribute to the state of the art in Systems Engineering. Unlike the International Symposium and the national conferences, there are no paper, panel or tutorial presentations. Instead, attendees spend three days working alongside fellow Systems Engineers who are there to make a difference. Systems Engineers at all levels and from all backgrounds are encouraged to engage in working sessions, and to contribute their knowledge and experience to take the discipline forward.

EMEA WS 2017 is targeted to Systems Engineers from Europe, Middle East and Africa (EMEA) and open to interested engineers from all over the world. INCOSE or local Chapter members as well as non-members are welcome.

For Information about membership, please visit your local EMEA Chapter website. Locate your chapter at the following link:
www.incose.org/ChaptersGroups/Chapters/sector2
