Improving the world through engineering

For bicycles, every gram counts. BMC's *impec* bicycle range takes full advantage of the most modern automated manufacturing methods to create bicycle frames fully-optimised to the load paths woven from carbon fibre, all in a zero-defect environment.

Join the IMechE's Switzerland Group on a tour of BMC's R&D labs and the production facilities for the *impec* carbon bicycle frames. This visit has kindly been organised by Walter Rovinolo.

Thursday 25 Sep 2014, 16:00
